Reliability Tomorrow”***

# About Shri Ram Industries

Shri Ram Industries is a precision machining manufacturer based in Ambattur, Chennai, specializing in CNC Turning and VMC Machining for automotive and non-automotive applications. Established in 2007, we have grown into a reliable supplier of high-accuracy machined metal components supporting Tier-1 and industrial customers.

## Our Expertise

Precision machining manufacturer since 2007 with Strong experience in automotive & industrial components.

- Performance-critical CNC & VMC machined components
- Automotive assemblies – Pulley, Housing, Hub adapters, Shafts
- Renewable energy parts – Wind transmission bolts & hubs
- Brake system components – Pistons, Torque pins, Flange shafts
- Industrial pulleys – Grooved, specialty, Precision series
- Specialty fasteners & engineered hardware

## Certification

**AUTOMOTIVE**  
 Heavy vehicle products  
 Commercial vehicle products  
 Passenger vehicle products

**NON-AUTOMOTIVE**  
 Medical equipment parts  
 Food industry products  
 Power industry products  
 Valve industry products  
 Farming industry products

IATF 16949:2016 Certified CNC & VMC Manufacturing  
 ISO 9001:2015 Certified Zinc Trivalent Plating Support

# Machining & Finishing Services

## Forging (Hot & Cold)

(Approved Outsource)

Max. Component Diameter: Ø 180mm

Max. Forged Length: 300mm

## CNC Turning & Milling

Max. Component Diameter: Ø 850mm

Max. Length: 2000 mm

## VMC Milling

Max. Component Size:

1650 x 600 x 600 mm

## Thread Rolling

Max. Thread Diameter: Ø 40 mm

Max. Thread Length: 125 mm

## Plating & Coating

(Approved Outsource)

Finish Types: Trivalent Zinc at  
Yellow, Black, White, Blue

## Drilling & Tapping

## Quality Assurance System

All manufacturing activities operate under an IATF 16949:2016 certified quality management system, ensuring controlled processes and automotive-grade standards.

### Key Quality Capabilities

- CMM & VMS Inspection
- Digital Height Gauges
- Surface Roughness Tester
- Hardness Testing
- Laser Marking Machine
- In-process & final inspection
- Packing and Distributing

## Infrastructure Overview

Built-up Area: 20,000 sq. ft.

Investment: USD 2 Million in machines & equipment

CNC & VMC machining floors

Integrated inspection & logistics support

## Skilled Workforce:

60–65 trained personnel including CNC/VMC operators, programmers, quality inspectors, and support staff.

## Trusted Customers
